EXSM 3935: JavaScript Fundamentals - JavaScript Introduction Assignment

Deadline: Sunday Nov 6, 2022 at 11:59 PM

GitHub Classroom Link: https://classroom.github.com/a/a6_Jc0GF

Introduction

This assignment is meant to be a graded assignment to assess your ability in writing a basic JavaScript program. Follow the instructions below to complete the task, and be sure to read the hints if you are lost! If the hints do not help, be sure to reach out to us during office hours.

Instructions:

Your program should run in the following order:

1. Collect the first name of a user (remember to provide a prompt!)
2. Collect the last name of a user (remember to provide a prompt!)
3. Assign both the first and last name to a new variable named "fullname" (include a space between the first and last name in the new variable)
4. Replace any 'o' characters in "fullname" to be 'a' characters and output the result to the console application (lowercase 'o' only!)
5. Ask the user to enter a number larger than 10 (remember to provide a prompt!)
6. Ask the user to enter a number smaller than 10 (remember to provide a prompt!)
7. Output the remainder of the larger number divided by the smaller number to the console application

Criteria

Requirement	Marks Available	Mark(s) Awarded	Comments
All inputs are correctly gathered (0.5 for each input)	2		
Assign the first and last names collected from user into a single variable of "fullname"	1		
Replace any 'o' characters in "fullname" to be 'a' characters and output the result to the console application	1		
Output the remainder of the larger number divided by the smaller number to the console application	1		

Total: /5
